# My true Teaching

Greetings, my dear beloved Souls!

Today I'll start dictating you messages about my true Teaching.

It had suffered so many changes over the centuries, that only the tiny grains of the Teaching have reached you in its original form.

The time has come when I can restore it completely, and correct the inventions and an intentional distortions, which have been done by those forces, that have taken control of human consciousness and diverted it into the direction, which allowed them to rule over people and force them to forget about their Divine origins.

But that concept is the foundation of my entire Teaching.

But let's start in the proper order.

Now after Father and Mother had told you a history of my life, you know that I was someone like you and came to Earth as a son of man, and not as God, as the church authorities try to represent me.

My life has been very happy and intense.

The reason why I have been able to accomplish so much in thirty three years, given me on Earth, was the result of my Soul's preparing very carefully and for a long time for such an important for me incarnation, developing a very detailed plan of actions and calculating every step.

Because my mission had a planetary character, the Creator had allowed my Soul to descend in both parts, male and female, which was a source of great happiness for me and the guarantee of success.

This Unification on a physical plane gave such a powerful impulse to my Soul, that I recalled why I had come to Earth, and immediately started to fulfill my mission, because my Soul knew how little time had been given to me on Earth.

## MY TRUE TEACHING

Thanks to my dear Mother, this great Soul, who had incarnated at the same time, in my early childhood I lived and was nurtured in a special environment, which in those times a very few people could enter.

Qumran - this island of happiness and spirituality - saved me from the temptations and cruelty of the world, where I have chosen to be born.

When I left the commune of Essenes, I was a completely developed person with a clear understanding of the Universal Laws; because life in accordance with these laws is the only thing capable of making human lives happy and full, and of course living with spiritual values in the first place.

Even though, my first attempts to explain to people my understanding of the world had not succeeded, I already knew that the only predestined path in my life was the work for the enlightenment of the people.

My meeting with Mary Magdalene had become the decisive moment of my life.

Reuniting as one on the physical plane, my Soul gained its wholeness at last and was “awakened” finally.

It was similar to enlightenment, and in reality it was unification with my Mother Soul, abiding in the eighth dimension.

From that moment, the unseen thread connecting us was leading me through life, paving all the pathways, directing me towards the main goal - fulfilling the mission for which I was born.

After the years of my travels throughout India, and especially after my visits to Agartha and communicating with its Priests; the Teaching, which I had to bring to the people, “came to life,” and I found a key for offering the Teaching, making it simple and accessible, make it trustworthy and close to the hearts of the people.

My life experiences and natural observance had given me bright and interesting images and curious stories, which served as an illustration to what I wanted to explain to people, and my natural sense of humor helped me to do it easily and funny, without preaching or being condescending.

I think that's why my sermons has been joyful for me and for the people who listened to them.

But I will tell you about it in greater details in my next messages.

Yeshua, who loves you with all his heart, spoke with you today.

## Conversations heart to heart

Greetings, my dear beloved Souls!

Today I'll try to give you an idea how I have conducted my sermons after my final return from India.

After I had arrived into some new town or village, my disciples, Mary Magdalene, and sometimes my Mother, who often accompanied us in our travels throughout Judaea, told people about me, which helped to create interest and curiosity of the public.

It had been that way in the beginning, when my name was still unknown. Later, the rumors about me preceded my arrival.

And when enough people have gathered, I announced the time and chose the place for a sermon.

Almost all of them have happened in the open spaces - in the beautiful gardens, on the shores of the lakes, rivers, or sea. I wanted a beautiful nature of our Mother Earth, with its exquisite colors and smells, to be my ally and assistant.

Most often, my sermons started from some kind of joke, or a funny story or a parable, in order to enhance the mood of the people and give a relaxed tone to our conversation.

And only when I felt that a real atmosphere of trust and goodwill has been created, I started to speak with people about serious things.

## MY TRUE TEACHING

I never have planned the topic of my our conversations beforehand, because first I needed to see the eyes of the people, who had come to listen to me, to feel their energy, to understand exactly what was important for them, what were their interests and hopes.

I think that even the very word “sermon,” which people are accustomed to use in relation to me, is completely wrong.

It would be more appropriate to call these meetings conversations heart to heart, an exchange of opinions and life experiences - anything, but not “the sermons.”

The word itself suggests a monologue, teaching, convincing, lecturing, something that was completely foreign for me.

I have not considered myself a Teacher or a Preacher and never put myself above other people, because I knew very well that we are all equals before God, that we are all his particles, his beloved children.

All the difference was in the following: that some of us have lived many lives and gained wisdom and knowledge, and some of us have come to Earth not a long time ago and were making their first steps in their spiritual development.

7

If I have made some kind of differentiation between the people, it was only between the young and ancient souls, in other words, developed and undeveloped souls.

But still only the developed souls have come to the meetings with me, because completely undeveloped souls still lived in another world - completely material one - and conversations about the eternal were still inaccessible and not interesting for them.

Before starting our main talk, I had established an energetic unity, for which I had lead a short meditation, almost unnoticed by the others.

For a moment, I closed my eyes and imagined the people in the group as bright lights that have come from Divine source, or as sparkles of fire intertwined in a beautiful Divine dance.

I felt with all my Soul, that we are one whole, who have been separated into tiny particles - to return into the lap of the Creator after our unification later.

## MY TRUE TEACHING

I felt how the space around me was changing, how it was filling with completely different energies, all the negative energies were dissolved and the hearts of the people were filled with Light and Love.

And only after this Divine “overture,” I would start to speak at last about the topic for which I have come to the meeting with people.

We’ll stop here today.

Yeshua, who loves you with all his heart, spoke with you today.

## To reach out to the hearts

Greetings, my dear beloved Souls!

Today we’ll be addressing at last the content of my conversations, which most often proceeded in the following order.

First, I’ve told the gathering who is God, of whom each of them have heard, but who is imagined differently, based on ones religious believes, on the social environment, where each person have grown, on ones upbringing and education.

I’ve explained to the people that God is everything they see around them: the earth and the skies, the water and the air, all the natural elements, the animals and the birds...

Everything on Earth is created by our Creator.

But the main creation is a human being, because he is God’s indelible particle, his beloved child.

And I’ve tried to explain that as simply as possible. Sometimes, I’ve said that our Creator is akin to the mighty and beautiful tree, whose branches are the nations and ethnicities living on earth, and each human soul is the leaf of this tree.

When each soul is coming to earth, it is developing like a bud on one of the tree branches.

## MY TRUE TEACHING

Gradually, this bud - Soul is ripening, filling up with the juices, and a new gentle growth bursts out from the bud, which later transforms into a strong beautiful leaf; but with time it is wilted and falls down to earth...

The same thing happens with a human body, in which a soul is incarnated. The soul itself is eternal and Divine, and it would come to earth as much as necessary to gain an understanding - who she is and what is the purpose of its incarnating on this planet again and again.

Thus, I've gradually led people towards the idea of reincarnation.

Sometimes, I've explained it that way.

The Soul is eternal and lives in the Heavenly spheres, where only Love reigns - the energy of the Creator, meaning there are no sorrow and suffering there, which belong to the lower and dense worlds.

But the Soul is very curious, and it wishes to try everything that exists in the Universe, and especially on Earth, where life is so colorful and unpredictable.

Everything exists here to help one experience very different emotions, to go through unbelievable tests, testing ones endurance and spiritual strength; to experience happiness and sorrow, to understand what it's like being rich and poor, what is kindness and greediness, mercy and cruelty, love and hate, in other words, to experience completely all the specter of feelings existing on Earth; to feel all the nuances and to gain a priceless experience of life on Earth, where the energies of the duality rule.

Every time when the Soul returns home into the Heavenly spheres, it carries all the experiences gained on Earth, to be able to think it over, to experience it again and to think how it is possible to improve life on this long - suffering Earth; how to fill the hearts of the people with Goodness and Love, which would allow them to live peacefully and happily.

And then, based on previous experiences, it would choose the next incarnation, new country, new social environment, in order to add the earthy experience it lacks, and to move further in the understanding how to help people live better and happier...

They have always asked me many questions, because such knowledge has been completely new and unexpected for the people.

And I've tried to answer these questions as clearly and precisely as possible, giving examples from life, wonderful and unexplainable interlacing of human destinies.

I've not changed my subject, unless I was sure that every person present there understood everything I've said, and accepted my words not only with their minds, but with their whole hearts and souls.

Yeshua, who loves you with all his heart, spoke with you today.

## **As within, so without**

Greetings, my dear beloved Souls!

Today, we'll continue our talk about my conversations with people, all of which had left an indelible imprint in my heart.

All kinds of people had come for our meetings, and I always been surprised how they listened to what I've said, with so much joy, curiosity, sincere sympathy; how they responded, sharing their own stories, funny and sad, curious and unpredictable, stories given by life with its unlimited fantasy.

And these stories have been a priceless source of help for me, because I could show people with their own examples how the Laws of the Universe are working, and especially the main law: "As within, so without."

And I've paid the greatest attention precisely to this law, because every person could follow its action in his life, if he have thought, at least ones, about the true causes of the events in his life, without blaming another person, which is unfortunately is common for many people.

Such is a human nature, when a person is happy, he is simply enjoying his life, not thinking about anything and often forgetting to thank the Creator for the joy that was gifted to him.

And only when he is not doing well, he turns to God.

## MY TRUE TEACHING

During my conversations, I've often wanted to explain to the people that they are the particles of God, which means they can help themselves and change their lives for the better.

But for that, they must learn to live according to the Laws of the Universe. Sometimes I've given them the following example.

I've said that every person is born in the flow of God's Love. And then this flow as a great and mighty river is carrying him through life.

But each person is free to choose - whether to stay in such a blessed flow, following its current, its Divine Laws, or to step onto the shores and to live according to the human laws, which were made up in order to hold human beings in fear and obedience.

I've explained that the Divine flow is the true consciousness of the human being, his natural essence, and to live in Love is as natural for him as to breathe.

But the people have forgotten about it! Or rather they have been forced to forget by those, for whom it have been profitable.

Instead of all-encompassing Love, slowly but thoroughly Fear has been introduced into the human consciousness, which gradually absorbed everything valuable, dear and beloved for them.

And this Fear, which took a firm hold on human consciousness, was responsible for the most destructive emotions, spreading around all the sorrows and suffering, servility, poverty, misery and sickness.

But someone, who succeeded in banishing his Fear and who again lighted up the fire of Love in his heart, could look at life with completely different eyes.

The Light of Love now was attracting to him happy events and good and kind people.

His life now was filled with the bright colors, generously sharing with him all the creature comforts.

It may seem like a magic, but that's exactly how the almighty Law of the Universe - "The outer state of man always reflects his inner content" - was expressed in real life.

I've often been asked the following question, which as I can see is still relevant for many people now, "But why is such a mean and bad person so happy and rich, and why am I, so nice and kind, so poor and unhappy?"

And I've answered then, "Are you sure that the rich man is happy? May be a real hell reigns in his soul, and if you could see that, you would not want to change places with him."

"Never judge a person according to external conditions, according to his material status, but try to look into his eyes, into his soul. And probably, you would see such a pain and suffering, such a fear of losing money and power, such possessiveness of his wealth, which doesn't allow him to sleep at night and which created sickness of his body and soul, that you would feel a sincere compassion for such a person."

"And there are so many happy people with modest income."

"They enjoy nature, which generously bestows its beauty on us, the love of their family, the fruits which they grow in their gardens, the bread which is baked by their beloved wives, the children's laughter, and even the physical work, which they enjoy because they see the fruits of their labor immediately and feel as real creators of their lives."

We'll stop here today.

Yeshua, who loves you with all his heart, spoke with you today.

## **We all are children of God**

Greetings, my dear beloved Souls!

Today I'd like to tell you how I've tried to explain the concept, that we all are the particles of one whole, regardless of the country where we were born, of the color of our skin, whether we are rich or poor, and of our religious believes.

## MY TRUE TEACHING

In those times, I has been difficult to understand as in a matter of fact is difficult now, because of the vast differences between the racial, social and religious groups in the world of duality.

I would have to find solid arguments and many different examples to help people realize their greatness and their unity with the Creator.

The expression “Each of you is a particle of God” seemed too fantastic for them, because they have considered God to be so unreachable, great and terrifying.

And then I’ve asked them to do the following: to remember the happiest moments of their lives, when Love filled their hearts, literally spilling out, and to feel how their bodies would respond, what would they feel inside.

Almost all of them have felt that they we were overflowing with bliss, and the feeling of warmth was spreading inside.

Then I’ve told them, “what you are feeling now is unification with God, because God is Love in its pure sense. And when your hearts are filled with love, you are joining with him, becoming one whole.

It is a natural state of our souls, which we forget, descending into material world of duality.

And the goal of each soul is - after going through a long path on Earth, being born over and over, often experiencing very different emotions and obtaining a priceless experience, to return back to the original energies of Love, which means to unite with the Creator.

But for that, the soul needs to become wiser and realize a great deal, gradually ascending on the steps of the spiritual ladder, purifying itself from the energies of fear, anger, aggression, greediness, jealousy, lust for power, which drag it down and do not allow to fly into Heavens.

And only then, a soul could come closer to God, because it will be attracted to Him based on the similarity of energies.

Thus, gradually I moved to the next Law of the Universe - “Like attracts like.”

## MY TRUE TEACHING

And then using numerous examples from real life, we've "studied" together how this law is working.

Then, people started to see differently many events of their lives, understanding the reasons for their sorrows and misfortunes.

"But the most important thing," I've told them, "that you can change the situation at any time. For that, you need to change your habitual thoughts and emotions, which means to become filled with completely different energies."

"Your spiritual work would be greatly rewarded. Everything around you would start changing if by magic."

"Your good thoughts and intentions would definitely attract goodness and wellbeing, happiness and joy into your life."

"However, it is necessary that it would come from your heart, enveloping people with sincere warmth and Love, because its impossible to deceive people - they would intuitively feel your falsity and respond likewise."

Thus, I've gradually led people towards an understanding that they themselves could create their reality, and that alone would prove that they are great and almighty particles of God.

And their main power is Love - that magic energy, which has mastery over everything...

We'll stop here today.

Yeshua, who loves you with all his heart, spoke with you today.

## Slaves or creators

Greetings, my dear beloved Souls!

I would like to divert a little bit from my story and tell you how the authorities and religious leaders reacted to my conversations with people.

Initially, they had not paid much attention to that, because they had considered me simply a strange man, who liked to talk and who had not present any danger for them.

But soon enough, the leaders sensed the danger coming from me, because after my meetings with the people, their influence on the people significantly decreased.

And in those times, the religion has been very powerful, being one of the tools of control over the people.

The Priests were under direct jurisdiction of the government authorities, creating a unified “system of rule” over human consciousness.

Gradually, as I had gained more and more followers, they started to realize the danger which I presented for them.

The people being creators of their own lives were not part of their plans. Besides, my conversations about reincarnation, free will and unity with Creator were contradictory to their dogma, which foundation stone was an obedience to and worshipping of God and the rulers.

For the time being, they could not present any accusation against me, because I haven't called on people for anything, haven't incited against the government, but simply have had friendly conversations with them, and they were free to accept them or not.

But because people have started to use the Laws of the Universe, which we have discussed, in their practical life, and were able to see that they were really working; because their lives have started to change for the better, the number of my followers started to increase every day.

## MY TRUE TEACHING

It was difficult to force a man, who has sensed freedom and has come in touch with Divine Love, back to the narrow box of the worldview as enforced by the religious and government officials.

For me, it was a proof that I honorably fulfilled that mission, for which I had come to Earth, and that people not only accepted my Teaching with all their hearts, but started to live according to the Laws of the Universe.

With time, the authorities started to put obstacles for organizing my meetings, and in some of the towns of Judea my name was already forbidden.

And I was very pleased that it have not stopped people who wanted to listen to me.

They traveled long distances of many kilometers in order to come to places, where I still could meet with them, and despite the obstacles, I had greater and greater audiences.

It made me happy, but at the same time I realized that now when hundreds of people gathered for the meetings, our conversations became different.

I knew very well that not much time was left for me, and I wanted that as many people as possible would be able to listen to me.

I saw that after meetings with me, people were leaving completely changed.

Even those, who had come because of curiosity and at the beginning had distrusted me, were leaving with tears in their eyes and with the faith that God is always with them and that their lives would definitely change for the better, if they would live according to the true Laws of the Universe, and not the ones that were enforced on them by the people.

It seemed that all the Higher Powers of the Universe helped me to find the right words, the colorful examples from life, to put the right emphasis, and most importantly to fill the people with an inexhaustible Divine flow of the energy of Love.

We'll stop here today.

Yeshua, who loves you with all his heart, spoke with you today.

# Steering wheel of your life

Greetings, my dear beloved Souls!

Thus, after a small diversion, let's continue with our story about my efforts to explain to people the meaning of my Teaching, which in reality is the code of Laws of the Universe, which is possible to express in several minutes.

But my task has been - to ensure that these Laws would stay in the souls of the people and become the main "tools" of surviving in the three dimensional world, and not simply a knowledge by itself.

That's why the main part of my sermons in front of the big audiences would still be examples from real life, accessible and understandable for everyone.

I have wanted to show the relationship between the cause and effect, which is the basis for each event in human life, because nothing would appear from nowhere.

Everything that happens around us is the result of our thoughts and emotions, regardless of the fact whether we realize it or not.

We are the ones who fill them with our energies, pour our emotions into our dreams, into our relationships with people, in every life situation.

We are the ones who "fill out the sails of our ships," on which we are sailing in life. And only we are responsible in which direction they are moving.

I have tried to explain to people the main idea - that everything is in our hands.

We are the captains of our ships, and no one would do our work for us.

And if we would fill the "ocean of our lives" with fear, anger, aggression, these negative energies would invariably summon "the storm," which would throw our ship from side to side, shaking our tiny ship, shaking our lives and driving us to fear, sorrow, and despair.

But if we would fill our "ocean" with Light and Love, Goodness and Mercy, our ship would sail smoothly and peacefully over the space of the water, in search of exciting

## MY TRUE TEACHING

adventures, visiting peaceful harbors, where our souls could rest, and we would enjoy all the joys of life.

I have had to convince people that it's not simply beautiful words but a true reality.

They often have complained to me about their lives, saying there were many obstacles in the path of their "sailing."

And I've answered them that it was for their highest good, because the difficulties and obstacles are the indelible part of any journey.

"The sandbars and reefs" which they had often met on their paths, are the tests for "the captain" of the ship. They polish his skills, until he reaches the perfection.

I've explained to people that our consciousness is unlimited and Divine.

Our consciousness is the "ocean" of life, which every person, who have descended to Earth once again, must cross.

And every our incarnation is meant to deepen and expand our consciousness - to increase our mastery, which we had developed in previous lives.

All our experiences are kept in a deepest memory, and we are capable to reach it, in order not to repeat our mistakes, but confidently move further towards the cherished goal - uniting our consciousness with the consciousness of God - which would allow us never to return again to this long-suffering Earth, but to continue our existence in others, the higher worlds.

From my allegory, I have moved to real life situations, which I have had a lot.

In that way, the people gradually have started to understand how one or another Law of the Universe is working, and that they are perfectly capable to use them in their own lives, to make their lives better and happier.

We'll stop here today.

Yeshua, who loves you with all his heart, spoke with you today.

# Miraculous healings

Greetings, my dear beloved Souls!

Today I'd like to reveal to you the secret of my "miraculous healings".

Because the rumors about them preceded my arrivals, a great number of ill and handicapped people were brought to the meetings with me, all of them asking to heal them.

I must admit that I haven't always agreed to do that, because I could enter the energy field of the human being and see the cause of disease.

It has not been easy to refuse the people who were suffering, and I have always attempted to do that as gentle as possible, explaining to a person that such a test had been sent to him from the Above, and I am not allowed to interfere with his destiny.

But I've said that he could help himself if he could understand why such an illness had been sent to him, and what he had been doing wrong in his life.

And if he would change his habitual thoughts, banish passions that possessed him, which were destroying his body and soul, then he would definitely heal.

I've explained to the people that illnesses are their negative thoughts and emotions that descended into their bodies, which are slowly destroying a person, who is possessed by the lower energies.

But even such sad experiences were a proof that they themselves create their own reality.

And if they could destroy their bodies with their thoughts and emotions, it means they could restore them by changing the destructive negative energies to healing Divine energies.

I've given them many examples from life, when a person believing in his power and filling himself with the energies of the Unconditional Love, has been literally reborn.

## MY TRUE TEACHING

I've told them that the waters of life and death are not fairytales, but reality. And that each of us could change the regular water into the water of life by the power of one's Love, or into the water of death - by the power of anger and aggression.

I've explained that illnesses are given to people for spiritual growth, for overcoming themselves, and for realization of their mistakes.

We must thank God for them, because they are the last measures for our "re-education," which means also the last hope that we would realize our mistakes and start changing. Than the life we have lived would not be in vain.

And if I could see that a person have accepted what I had said with all his heart and stands on the threshold of the spiritual renewal, then I would place him in my energy field - in the energies of the Unconditional and Unlimited Love - and he would heal in front of my eyes.

But I have not done that to demonstrate a miracle, but to prove to people that everything I had said - are not an empty words, but reality, which is accessible for everyone.

I've revealed to them "the mechanism" of the healing, explaining that I've already reached such a state when I cannot attract illness because of the great differences in our vibrations.

We are all living magnets, but the content of the magnets depends only upon us, which also means what we would be attracting to ourselves.

People have been especially impressed by the fact that the wounds were closing in front of their eyes, when I've placed my hands over them, when the blind people have regained their sight, and the lame one's have stopped limping.

But it have happened because when they were placed in my energy field, their bodies gained a different structure, filling with the Divine energy of Love, and soon all the deformed parts of the body have been restored.

But the most important thing for me has been convincing people that it was possible for them too, if they could change themselves, their perception of life, their worldview, they would be filled with different energies, changing the content of their "magnets."

“Of course, you need time and painstaking work for changing yourselves,” I’ve told them, “But the results are worth it. You’ll become the creators of beautiful reality, real Gods, descended to Earth.”

We’ll stop here today.

Yeshua, who loves you with all his heart, spoke with you today.

## The main landmarks of life

Greetings, my dear beloved Souls!

I am coming towards the end of my story, and today I’d like to sum up what I’ve been teaching people, to give you the emphasis of my Teaching, and the main life’s landmarks which I’ve tried to put into the human consciousness.

**First and the most important** - is an understanding that everything on Earth and in the Universe consists of the energies of different vibrations. And this energy is alive, it possesses its own consciousness.

Every second of our life we interact with it, attracting to us the energy, which is reflecting our current state of consciousness, thoughts and emotions.

This is the foundation upon foundations, from which all other Laws of the Universe take its origin.

**Second** - we all are the children of One God - the Creator of the Universe, his indelible particles.

And our natural primeval energy is the energy of Love, because God is Love, All-encompassing, Unlimited and Unconditional.

But after coming to Earth, we forget about that, just as we forget about our kinship with God, the Creator and with every person on Earth.

## MY TRUE TEACHING

We become part of the game, which includes concepts such as “us versus strangers, kind and mean, masters and slaves, rich and poor” - another words, a game where the energies of duality rule in all its varieties.

But the main rule of “the game” is the following; after completing a long path of very different tests, after being born again and again in different bodies and in different conditions; we’ll remember about our Divine origins and choose, at last, our own native energy of Unconditional and Unlimited Love, which would allow us to merge with the Creator, which means to return Home, to the Source, from which we had descended to the dense world for unique experience and development of our Soul.

I have often been asked, “But why should we descend to Earth, where is so much sorrow and suffering?”

And in order to explain that, I have had to move to **the third law** - the Law of evolution.

Everything in the Universe is in a state of movement. Everything aspires to perfection. But in order to reach that, sometimes it’s necessary to fall to the very bottom, to enjoy the victory later, after overcoming many tests.

I often have given examples from folk fairytales stories, because they reflected the deep knowledge about the spiritual development of the human being - about the path of his Soul to God.

I’ve tried to explain that our Souls, while staying in Heaven between the incarnations, choose themselves their “adventures” on Earth, and the more ancient and wise is the soul, the more complex path it plans for itself.

But the fact that we forget about that after our descending to Earth, is also part of this Divine “game,” whose participants we all are.

Perhaps, it has been the most difficult point to explain to people, because there has been a very few examples which could support the truth of my words.

Only a few people has been allowed to know, while in incarnation, the goals of their soul and to start fulfilling their missions, as it has been with myself, Mary Magdalene, my mother Mary, John the Baptist and some of my disciples.

But still people have believed me, because everything else I've told them proved to be true, and they have seen in the examples from their own lives how the Laws of the Universe were working.

We'll stop here today.

Yeshua, who loves you with all his heart, spoke with you today.

## Love begets Love

Greetings, my dear beloved Souls!

Thus, let's continue our conversation about what I've considered to be the most important in my Teaching, and how I've tried to explain it to the people.

I think that I've paid the most attention to the Law of the Universe “**as within, so without,**” because the deep understanding of this law, and most important, its life application could change the destiny of man and make him truly happy.

I've explained to people that it is not only necessary to remember sometimes that the external reflects the internal, and to change your thoughts and emotions in each particular situation with the goal to receive what you want; but it's important to learn **TO ALWAYS LIVE** in the energies of Love, which would help them to achieve harmony in their souls and in their approach to life.

Constantly “glowing” inside, being completely filled with Love, would allow them to really change their lives for the better.

These Divine energies would serve them as a reliable protection from all problems, and it would attract into their lives good and kind people, happy events and favorable situations.

**Love begets Love.** It had become one of my favorite commandments.

And the following one: **Every person is a creator of his reality.** And he could change his reality at any minute by the power of his thoughts and intentions, because he is like God, whose particle he is.

I've also paid great attention to **the Law of Free Will.**

Many people have understood it wrongly, understanding it as permissiveness.

I've explained this law in a following way, so it would be more accessible.

I've said that **a free choice** lies at its foundation, and every person has to make it for himself.

Someone else's will and someone else's choice, imposed upon you, would not make you happy, because each soul is unique and has come to Earth with its own goals. Only you through your own spiritual work would be able to "remember" and feel what you really need, and what would help you to fulfill your mission.

And for that, you need to ask yourself, "What does my soul want? What would make me really happy? What would bring me joy and satisfaction? What could I do the best? What is my talent? What could I do to serve people?"

And while responding to these questions, it is best not to base your answers upon practical considerations, average societal values, traditional views on life, but to look deep into your soul and to understand what the Soul - your Divine particle wants, and not you as a person living on Earth.

The response may come as illumination, as a guidance or a sign from Above, which the destiny would arrange for you in the form of a person you need or as an unexpected situation.

It's important to discern all kinds of guidance, sent to you by the Higher Powers or your own soul. They are always present in the lives of every person.

Always listen to your intuition, which is the voice of your soul. Your Soul is always with you, within your hands reach. And if you could learn how to have a dialogue with her, your life would take on a completely different meaning - you will unite with God, who would lead you through your life.

I've always given many examples from life and asked the people who have come to the meetings to tell their stories, supporting my words. And such stories has always been shared.

We'll stop here today.

Yeshua, who loves you with all his heart, spoke with you today.

## God is Love

Greetings, my dear beloved Souls!

And in conclusion, I'd like to tell you about another Law of the Universe, which plays a very important role in human life.

It is the **Law of cause and effect** that I have wished to explain to the people - that **God never punishes people for anything.**

25

All the adversities in your life happen, because you YOURSELF attracted them by your thoughts, emotions and actions.

Just as all the happy and joyful events in your life come to you as an award for the righteous actions, coming from your heart and filled with Love.

But the chain of connections between the cause and effect could be so long that not everyone is able to follow it, because it may go even to previous incarnations.

Life is complex and multifaceted. Very different people surround each person, and they enter with them into the very complex and often entangled relationships, which could continue from previous lives.

Often the souls are born in the same family with the purpose to untangle the old knots, to finish something they could not finish in previous incarnations.

## MY TRUE TEACHING

And it is something that is practically impossible to follow. But if you know about it, many things could be seen differently, more consciously.

There are many signs which would allow you to discern an old connection.

The more difficult is a relationship with a person, whom you met on your path, the more certain you can be that you must untangle the old “knot,” coming from another life.

And for that, you must accept him as he is and love him with all your heart. Only love could put an end to the old feud and free you from further suffering.

But most often, the cause and effect lay on the surface, and you can easily follow the chain of events, flowing from one to another.

I am sure that each of you can find many examples from your own life.

And the last thing that I want to tell you.

You have to remember that the Laws of the Universe are connected with each other and flow from one to another.

And that’s why, it is impossible to build a happy harmonious life, utilizing only one of these laws and forgetting about the others.

But if life in the energies of Love could become a natural state of your soul, then you won’t have to think which law you are following and how, what is flowing from what, and what kind of the effect will follow.

You would reach your Divinity, because **God is Love**, which means you’ll create your reality according to the Laws of the Universe, without thinking about them.

A person, who constantly lives in the energies of Love, is not capable of breaking any of these laws, because his consciousness is already going out of the limits of the dense world and abides in the higher spheres.

And I am glad that many of you have already come to such a state, and all you need is to make the last step in order to cross over into the Fifth dimension together with your beautiful earth.

**MY TRUE TEACHING**

And now I finish the series of my messages and bless you for a harmonious shift into reality which is new for you.

Yeshua, who loves you with all his heart, spoke with you today.
